ADAM

Meet Adam...a new collection of multi-purpose seating that includes quality construction and exceptional comfort. Featuring solid maple hardwood frames in a choice of finishes, Adam provides both roomy comfort and heavier than normal weight load support. The curved shaped arms assist in the chair's easy handling and in assisting

occupant access and egress. Adam's field replaceable deep cushioned seat features a two way stretch Matrix base unit supporting multi-density layers of high resilient foam. Options include upholstered arm rests and a choice of ladder or upholstered backs. Adam meets TB133 and California's tough AQMD and CARB requirements

700 Arm Chair
