## AUDIO/VISUAL CABINETS

These exciting combination media cabinets provide the ultimate in flexibility and comfort. Their inside dimensions allow for most all size portable and table model television sets, video cassette recorders and other sound recording and playback devices.

The upper TV/VCR section features a fully finished hardwood interior, quiet ball bearing action receding pocket doors and a ventilated back that has a knock-out panel section for deeper projecting television tubes. The TV set rolls out and swivels on a ball bearing mounted hardwood platform (optional). Directly below is a hardwood enclosure with a 6" clearance height for a VCR cabinet or tape storage. The doors have security locks.

The lower cabinet section also has a fully finished hardwood interior with adjustable spring action swing doors. The cabinet includes one adjustable shelf, a multiple outlet power supply with surge suppresser, cord grommets and security door locks.

The entire cabinet is mounted on heavy duty concealed casters with soft rubber treads. The outside back is also fully finished.

The cabinets are available in both traditional (shown) and contemporary/transitional styling. Choose from a wide selection of finishes in cherry, maple, oak or walnut select hardwoods and veneers. Finishes can also be specified in a satin or luster sheen.

*Illustrated on front: Model VH3675AVLUS traditional styled cabinet with optional pull-out swivel TV shelf in #12 cranberry walnut with a luster sheen.*
