## CANOPY - INNOVATIVE + AFFORDABLE

Introducing Canopy, an innovative table system in a functional collection of shapes and sizes. The cantilevered leg design provides maximum leg space and easy multi-table ganging. It features a polished cast aluminum detailing for additional strength and stability and a large adjustable floor glide.

Canopy tables are available in over forty standard shapes and sizes and more than one dozen edge details. The 1.25" thick solid wood core tops are available in a wide choice of laminate and wood finishes. The legs are shown in both powder coat and wrapped wood veneer finishes. They are also available chrome plated. Overall table height is 29".

Options include locking casters, power and wire management, modesty panels, drawer and tray accessories and ganging devices. Drawer pedestals are also available in matching metal or wood finishes. Refer to the EOC "Tables" price book for further information and specifications.
