

CASCADE

More New Features and Options!

Designed by: W. Howard Pratt
Patent Pending

Cascade was one of the most popular products introduced at the 2007 Healthcare Design Show. The model 2062 shown here features a new optional tufted pillow style back rest (-T), full suspension storage drawers (-D), hardwood arms (-H) and matching plinth bases.

CASCADE

Designed by: W. Howard Pratt
Patent Pending

This new sofa bed from EOC offers a versatile solution to busy and congested healthcare patient rooms. As a sofa it provides extra back, neck and head support, including a built-in lower lumbar back cushion. Flip the back down and it becomes a comfortable bed without encroaching into the room.

Patented Flip Mechanism

Cascade's unique "flip" mechanism allows the unit to instantly transcend from a sofa to a bed with the simple flip of the wrist. No exposed or unsafe scissor mechanisms or hidden release latches to deal with. Cascade does not extend beyond its own floor area when opened into a bed.
