CHAMELEON

A Charles Gibilterra Design

-TA Traditional Arm (3"W)

-CA Cantilevered Arm (3" W)

-SA Storage Shelf Arm (6"W)

Detachable Arm Styles

Chameleon's features include optional field replaceable arms in a variety of styles and finishes (shown at left) including a space saving storage shelf arm. These arms can be quickly attached and detached without tools.

Cushion Construction

The seat and back cushions are constructed of molded foam for maximum comfort and durability. The back cushion contains a storage compartment for extra pillows and linens (top right). It opens and closes with the unit, never touching the floor.

Mattress Construction

The innerspring mattress cover and sides are constructed of a moisture proof, anti-microbial cover and an optional fireproof barrier interlinear.

Instant Mobility

With the simple flip of a lever (bottom right) the entire unit raises onto its built-in casters for easy maneuverability in the room or down hallways.

Dimensions (")

Mattress:	29W 79L 17H

Extra Pillow & Linen Storage Compartment

Mobile Caster Base Lever

Elements of Care

CHAMELEON

A Charles Gibilerra Design

Chameleon is a very flexible sleeper unit that saves staff transition time and steps. Its modularity and mobility allow it to instantly adapt to almost any requirement. It functions as a superb seating unit that converts into an extremely comfortable bed complete with mattress, linens and pillow, in just seconds.

The arms and back can be quickly removed (without tools) for cleaning, space adaptation or ganging into a double sleeper unit. The spring assisted heavy-duty sleeper mechanism features the latest in spring-web mattress support and has a 10 year warranty. A lift lever instantly mobilizes the entire unit onto casters.
