# CHEVEE TABLES

Who said four legged tables had to be metal? Chevee Tables bring the warmth of wood into your available choices for either free-standing or systems tables. The table shown left and on the front has laminate stone inlaid.

The Chevee's collection of solid hardwood framed tables is designed for both freestanding and cluster arrangements. The tops are in a choice of materials including wood veneer, high pressure laminate and inlaid stone laminate. They are supported by a 3/4" thick solid wood understructure and a 2" high full perimeter hardwood apron in a choice of finishes. Accessories include ganging attachments, power outlets, wire management and articulating keyboards.
