Companion Benches and Tables

A complete selection of occasional tables (with flip lid storage compartment options) and upholstered benches are available in 1, 2 and 3 seat sizes.

Construction Design

The frame is of durable tubular and channel steel construction in a choice of powder coat finishes, including the silver shown. Echo's construction addresses heavy traffic and high maintenance issues. The multi-density foam cushioned seats have stretch web support construction. The arm rests are of washable soft urethane foam with steel reinforced mounting plates. Echo seating components are field replaceable and include metal to metal threaded fasteners.
