

The *Flight Table* shown with its optional power island, glass ends and partially spread matching wings.

The Flight Table

Bringing Warmth and Flexibility to the Conference Room

The Flight Table is a combination board, video conference and training table all in one! It is shown with a 56"x120" elliptical shaped top and wedge shaped solid hardwood edge in #40 Natural Cherry. The bases are a beautiful blend of wood and metal arches and cylinders. The 12" diameter polished metal base plates adjust and level the table surface as you rotate them.

The Flight Table is standard equipped with concealed power troughs built into its base assembly. The "U" shaped center support panel has touch latch access doors on each side.

The Power Island (optional) is equipped with 20 power outlets (10 on each side) for quick and easy above surface access. It includes 12 simplex outlets and 8 data ports. Also included

are 3 recessed Halogen lights with vented reflectors and a switch, providing soft canopy lighting for darkened room presentations. It is topped with a 3/4" thick floating illuminated glass server shelf.

The Expandable Wings (optional) give nearly twenty square feet of additional surface space for training and video conference use. They easily swing open as much as 25 degrees viewing angle on concealed steel pivot pins and are quickly removable. They have protective felt backs and can be ordered in matching or contrasting wood or laminate finishes.

The Glass Top Ends (optional) act as servers and mini lecterns. They also provide a safety stop cover for the expandable wings.

Executive Office Concepts

Executive Suites conference tables are available in a wide variety of sizes, shapes and finishes, including multiple sectioned tops and bases. Refer to the price and information book for details. The wood finish shown is #40 Natural Cherry. The Power Island shown on the top is an available option.
