

# Nature's Elements

...architecturally inspired.

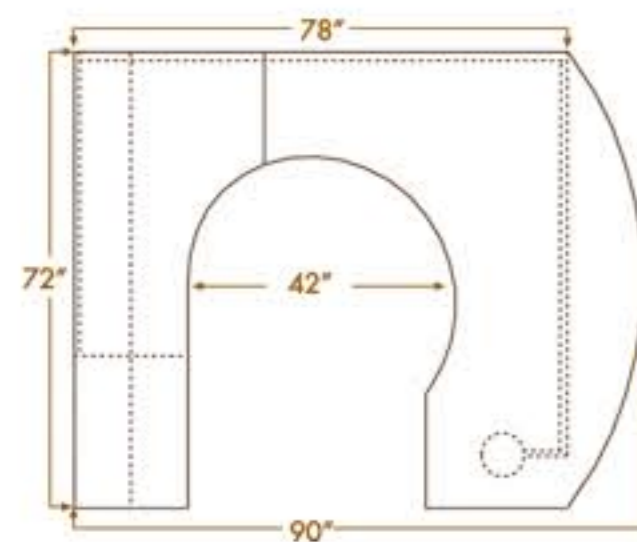

Nature's Elements' optional Inlaid Stone Laminate Surfaces have a hand fitted smooth and seamless hardwood edge perimeter. Shown here is Graphite Talc with Medium Cherry wood finish.

From the rich hand rubbed veneers, French dovetailed drawer interiors and full ball bearing drawer slides to the seamless decorative inlays and crystal clear finishes, Nature's Elements spells success. The desks shown on this page have special angled work surfaces ideal for guest/monitor viewing. The ensemble below features a glass door and shelf hutch. Antique Cherry with Graphite Talc inlaid top. Floor area: 72"W x 104"D.

This capsule U shaped work center has special angled surfaces for easier computer/client eye contact. Choose from a variety of exciting new options, including suspended glass shelves, metal trim, privacy panels (inset) and a variety of storage pedestals. Shown in Medium Cherry.

These new cockpit desks feature surround work surfaces, ample maneuverability and a space saving 45 sq. ft. footprint. They are loaded with options and storage space. Shown in Charcoal laminate finish with a Zebra Wood decorative veneer top and a metal accent trim.

Architecturally inspired furniture designs with crystal clear hand rubbed hardwoods and veneers that look and feel right. Shown in Mahogany wood finish.

Nature's Elements' modular bookcases and lateral files are available in 30", 36" and 42" widths in two through five openings

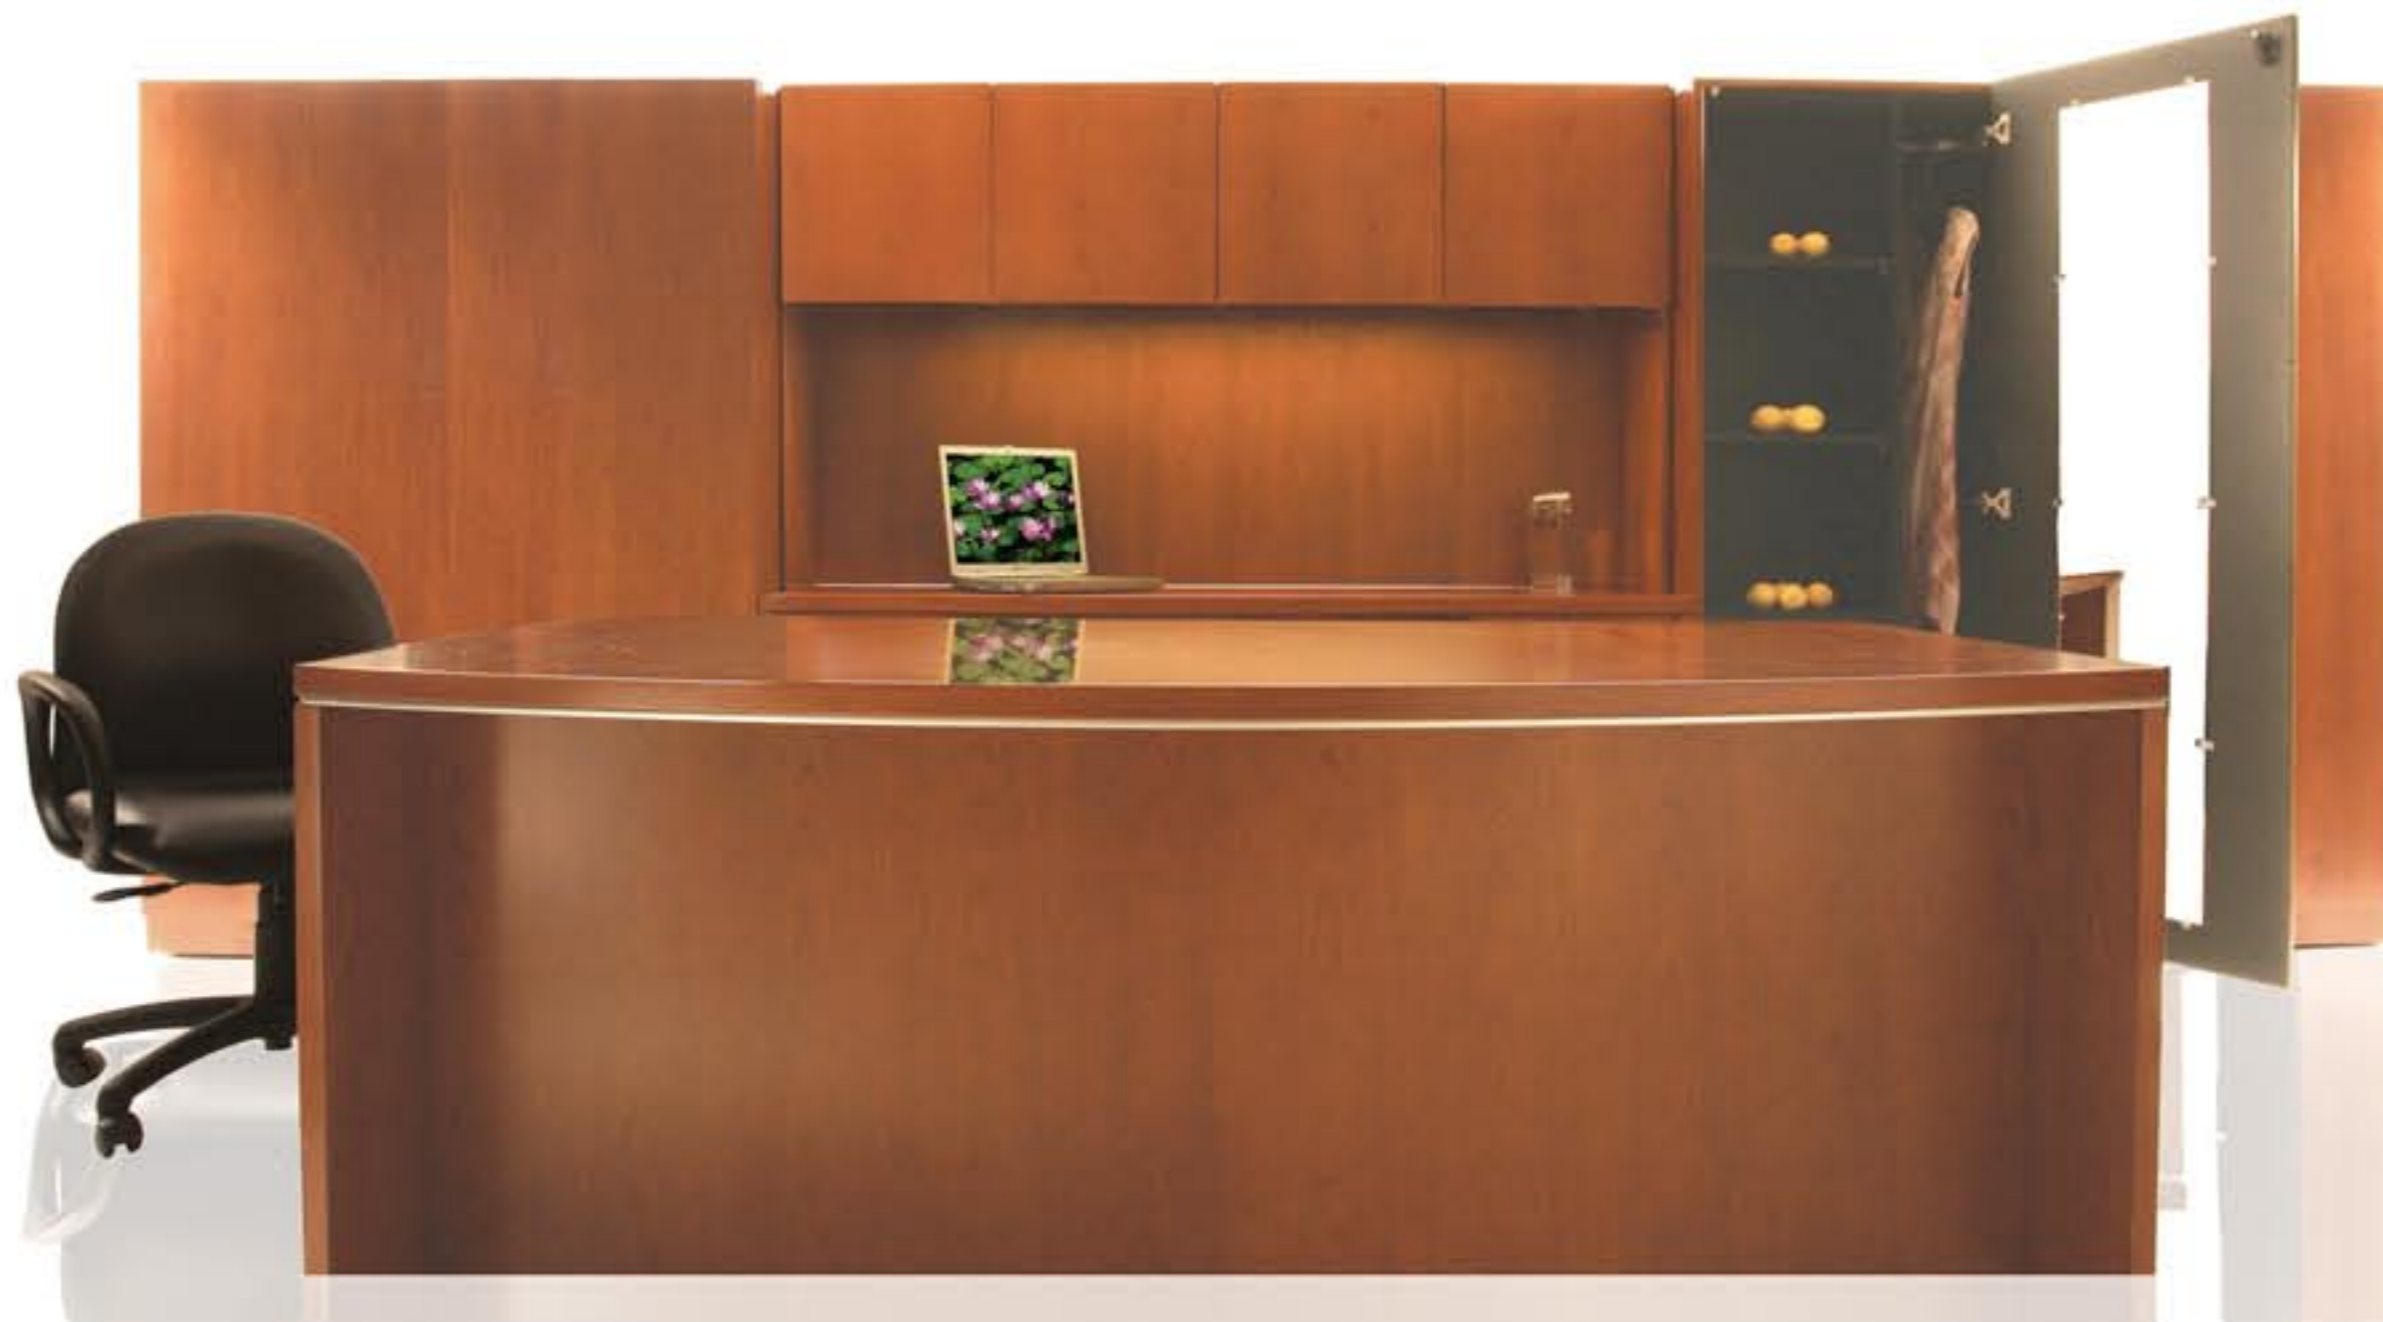

Above: Nature's Elements' contrasting solid color laminate finishes.

Top Row: Nature's Elements' seven standard wood finishes. \* Asterisk indicates also available in laminate

Bottom Row: Premium decorative veneer and stone laminate inlays.

Silver trimmed work surfaces, full length interior door mirrors and extra wide (42") cabinets are just a few of the many available options. Finish shown is #49 Honey Cherry.

Nature's Elements...expanded to include more refreshingly new...environmentally correct choices.

Now you have even more choices from this architecturally inspired casegoods collection! New shapes and configurations that make precious space more effective and work easier. These innovative solutions include new decorative work surface inlays, metal and glass enhancements and cost effective laminate finish options.

Nature's Elements is made in the USA using quality American hardwoods, veneers and laminates. Stains are hand rubbed (not sprayed) to prevent "painting" over the wood's natural beauty. Other major benefits include health protecting low VOC (volatile organic compound) materials and thicker, refinish-able wood veneer surfaces.

There's much more to the Nature's Elements' story, including factory chartered blanket wrapped, damage free delivery, saving un-cartoning and field assembly expense, including packaging material disposal costs. For more information on this exciting collection, contact your local EOC dealer or representative, or visit [www.eocorp.com](http://www.eocorp.com).

Drawer pull options :

HPB black hood (standard)

APC silver arc

APB black arc

HPC silver hood

This collection features a uniform architectural hardwood edge for maximum configurability. It is shown here with an optional Arch (bow) shaped top and silver trim.

Drawer pedestals are available in both ¾ (shown here) and full height. Drawer pull options are shown at left. Finish shown above is #33 Natural Maple.
