

S-Class Seating

"B" Base
Black Powder Coated Aluminum (shown)

"A" Base
Black Glass Filled Nylon

"C" Base
Silver Powder Coated Aluminum

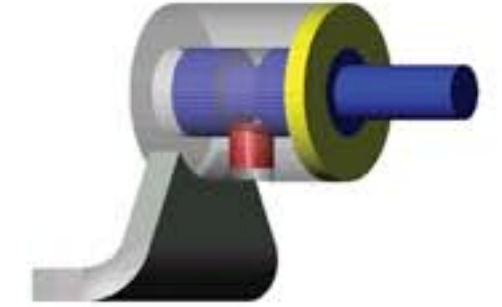

"W" Base
Metal Reinforced Wood Base

OTHER NOTABLE FEATURES

S-Class chairs have a high resilient foam seat pad, for extra comfort. They are shown in EOC's black Madrid leather like upholstery. They are also available in EOC textiles and leather as well as factory approved customer's own material. Two simple knobs control all of the chair's functions, including recline, pneumatic elevation, tilt tension and tilt locking angle.

PRECISION ENGINEERED

The internal working parts are computer designed for long lasting performance. At right is a CAD drawing of the lower metal pivot housing for the flex action arms. The part was put to a 200,000 cycle stress test before final approval.

BASE OPTIONS

Choose from three (3) chair base options, including black glass filled nylon (A), black powder coated aluminum (B) and silver powder coated aluminum (C).

PERFORMANCE TESTED

All S-Class Seating has been tested to and exceeds ANSI-BIFMA standards. The back and seat mechanisms were fully reclined with static loads for 200,000 cycles without incident. The control mechanism meets DIN 4551/88-5.6.3, ANSI/BIFMA x.5,-1993-11 & 16 and BS 5459-2/90 9a: side to side.

EOC builds the S-class Seating chair in the USA. Many of its parts are made from recycled materials. For more information on S-Class Seating and other exciting EOC seating, casegoods and furniture systems, please visit us at www.eoccorp.com or call (800) 421-5927.

Executive Office Concepts • Elements of Care

READY FOR THE NEXT LEVEL?

Introducing motion seating for the executive office and boardroom. A chair engineered with wood and steel rather than plastic. A comfort sit and ride that is unsurpassed!

Charles Gibilterra designed it to fit people of most sizes, without needing a lot of confusing knobs and levers. A fine seating piece that matches your decor...not your computer.

A tension adjustable suspension system allows the back to recline and lock in variable positions. The seat and arms recline in a synchronized ratio with the back.

609M-A Management Chair
41-44H, 25W, 32D

600M-AC Guest/Conference Chair
38H, 22.5W, 22.5D

The flex action arms are molded soft textured urethane. They have a concealed spring steel insert that allows them to recline with the back (shown at left). The seat tilts only slightly, keeping the user's feet comfortably on the floor.

610M-WA Management Chair
41-44H, 25W, 32D

GUEST/CONFERENCE CHAIRS

The S-Class collection includes metal framed arm chairs in a choice of matching wood/mesh or fully upholstered backs with comfortable steel reinforced urethane arms. The optional caster base adds mobility to this handsome multi-functional seating piece.

WOODEN BACK MANAGEMENT CHAIRS

Shown below is one of two back and base options on the Management Chair. The wooden outside (upholstered inside) back and wooden base are available in a choice of standard or custom finishes. The outside back can also be specified fully upholstered.
