

SYNC

eoc

SYNC

The SYNC seating system provides exceptional sitting comfort and support using today's more user friendly motion controls. Models 16 and 17 are equipped with a tension adjustable suspension system that synchronizes the seat and back recline. It can be locked in various positions with the simple push of a button. The chrome

sleeved telescoping arms with coated non-degradable gel arm pads adjust in height. SYNC is also equipped with flex action laminated inner shells and shock absorbing pneumatic cylinders. Options include adjustable width arms, adjustable height backs and adjustable depth seats.
