

TRANSFORMER™

...THE changing workplace.

SYSTEMS COORDINATES

Just like the world of technology for which it was designed, Transformer instantly adapts to your immediate requirements. The mobile table/desk's special bases with recessed casters let you quietly roll it into place. One minute a video conference center . . . an executive work station the next. A media center that supports conferencing, educating, and demonstrating, while keeping you current with the wide world of business, sports and entertainment. No wires to tie you down; the concealed wireless communications

equipment keeps you in control from any position. Flexibly manufactured, the 78.5- high wall system expands to both sides with an endless parade of optional storage and showcase cabinets on standard 18" and 36" widths. The wall system can stack, suspend cabinets over work surfaces, and even turn corners. Or take it still further: custom configure your own unique dimensional and layout requirements. And complete it with traditional, transitional, or contemporary edge details, finishes, and accents.

Executive Office Concepts • InnerLink • Elements of Care

TRANSFORMATION

Beautifully transforms two space consuming business functions into one . . . in just seconds . . .

...from conferencing...

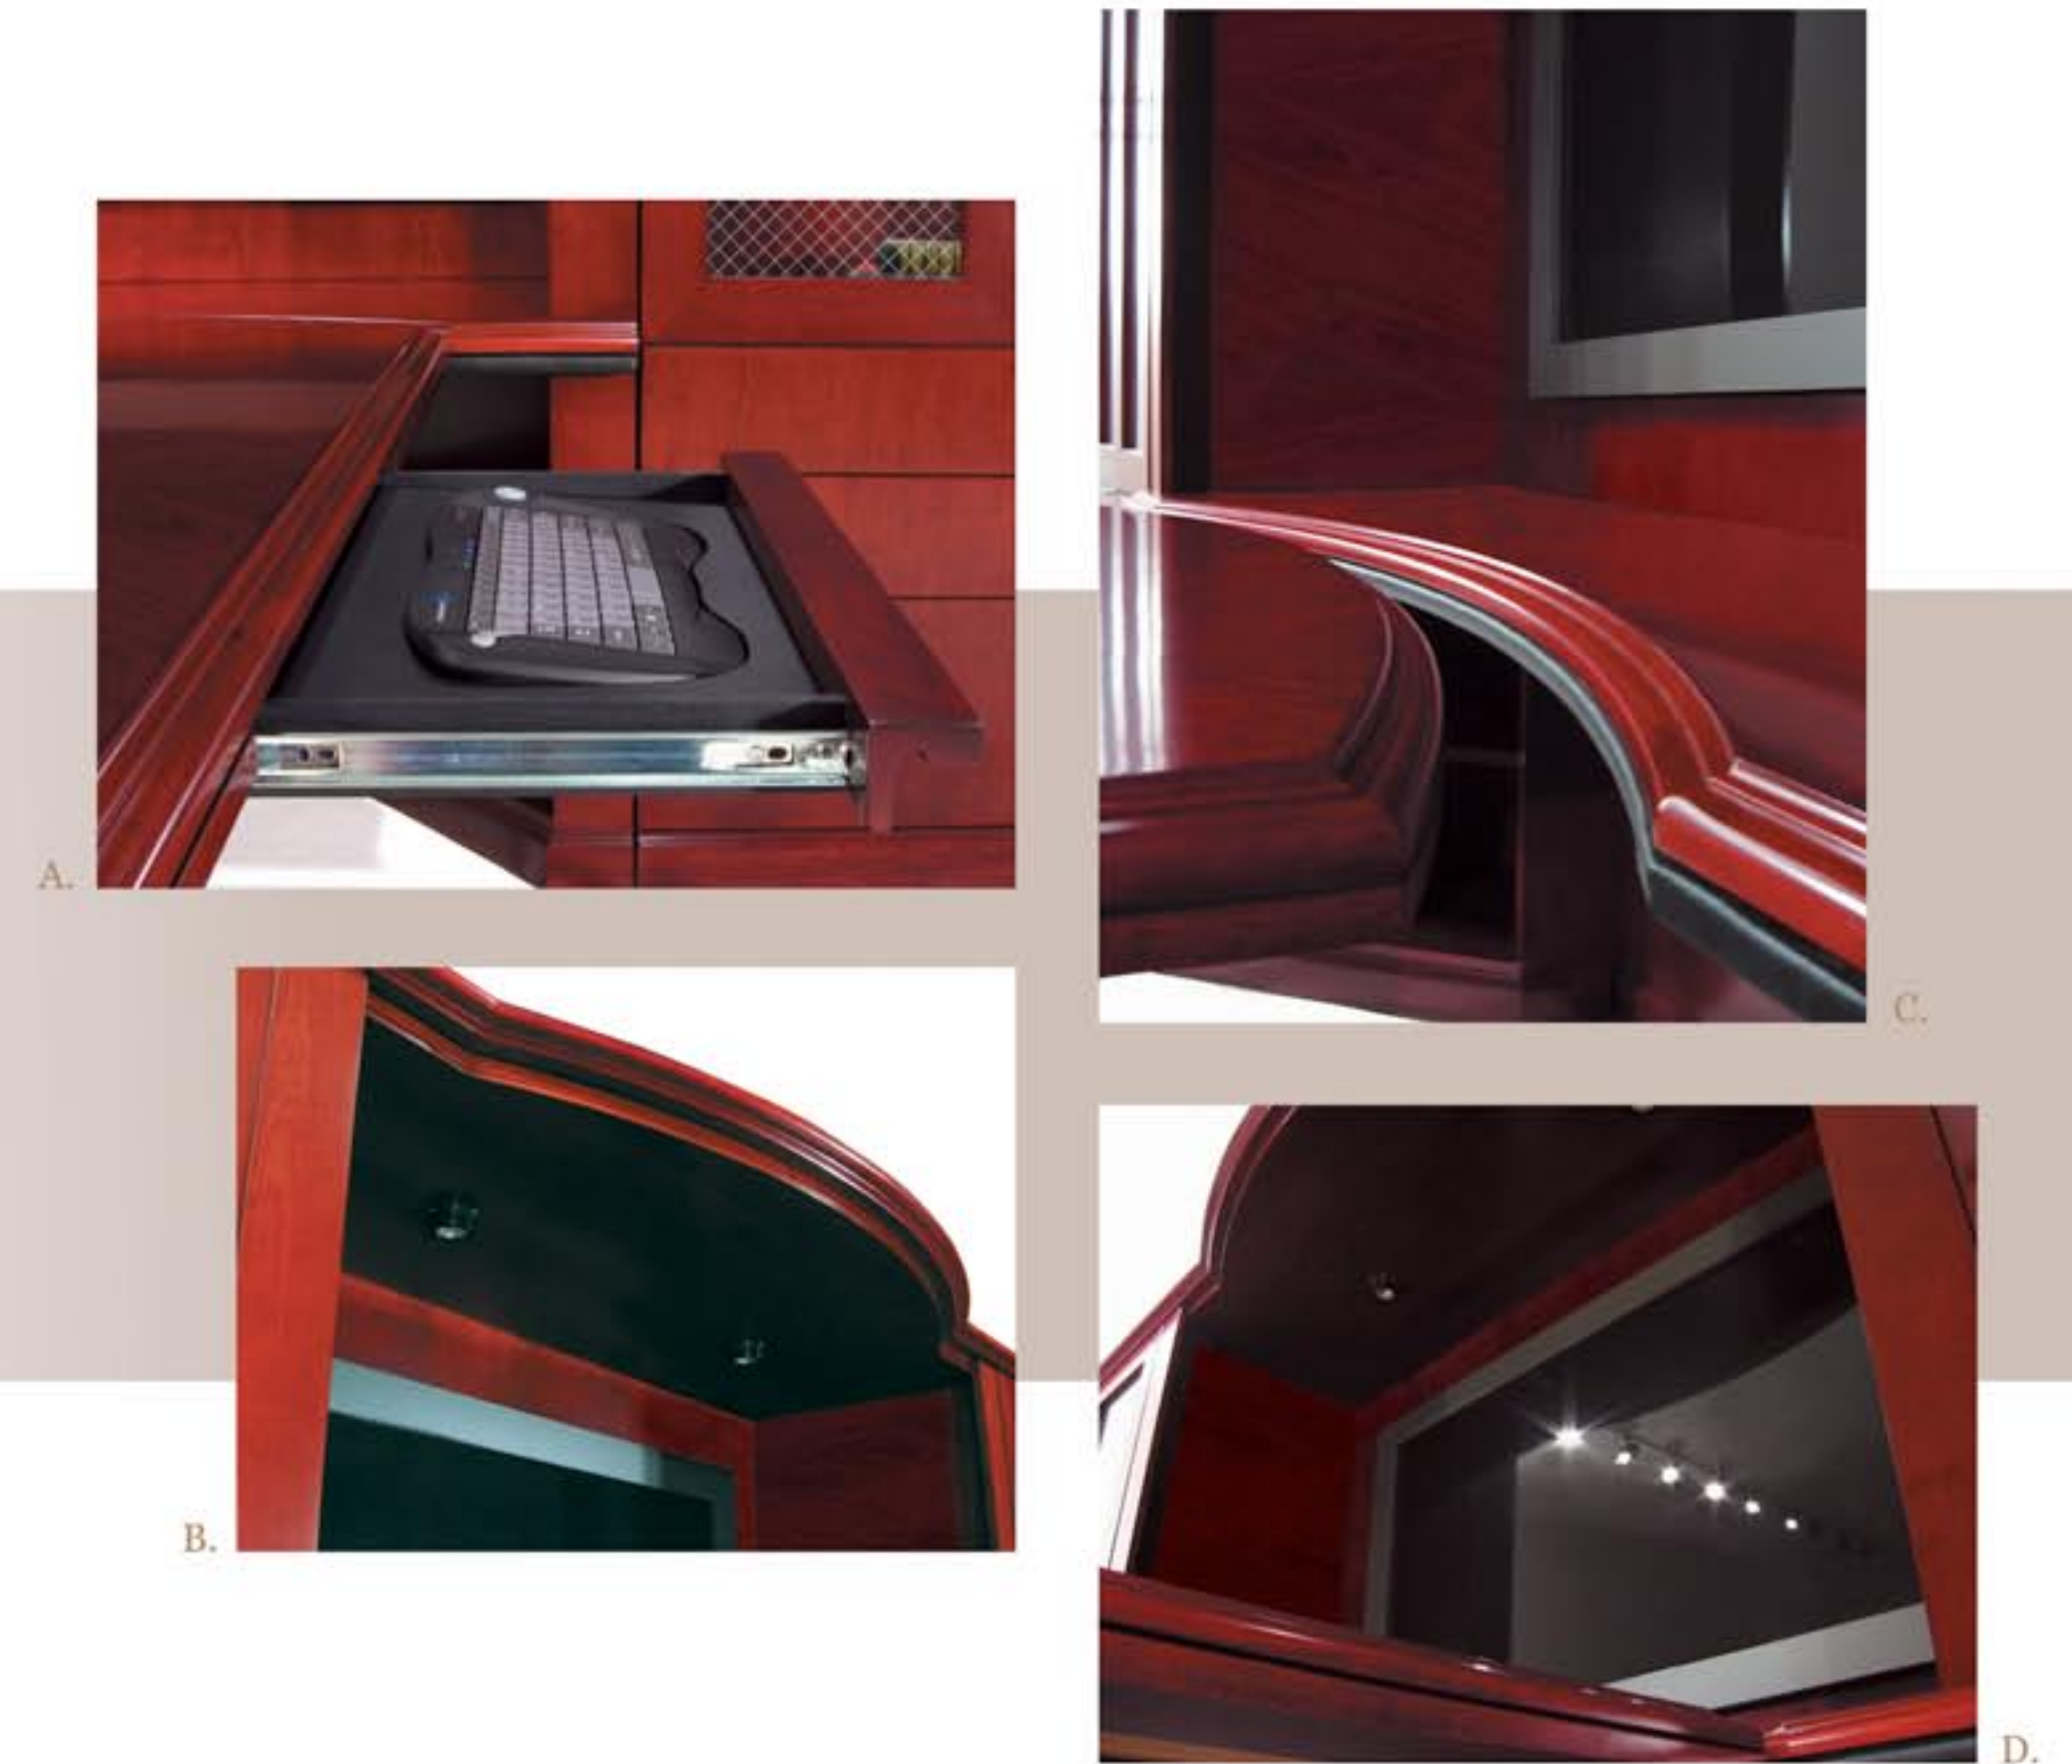

A multifaceted AV/Conference center, ideal for client and associate briefings & interactive media communications.

...to desking.

An executive work station complete with reference drawers, storage, endless filing capacity, & display cabinet options.
