CHEVEE

GENERAL INFORMATION

TOP: The Chevee Table system is a contemporary collection of solid hardwood framed tables designed for both free-standing and cluster arrangements. The table tops are available in a choice of high pressure laminate or wood veneer, which are supported by a solid wood understructure. The overall top thickness is approximately 1 1/4". A 1/16" decorative reveal detail runs the perimeter of the top's edging.

APRON: A 2" high solid hardwood apron runs the perimeter of the top, recessed in approximately 3" from the edge. The apron provides both top and leg support as well as extra stability. It also functions as a concealed connection point for the optional ganging device.

LEGS: The distinctive solid hardwood legs add to the uniqueness of the Chevee Table system. The legs have a multi-tapered shape, giving the table a sleek, almost wedge-like appearance. Coming off each corner at a straight 90 degree vertical angle, the leg is set at a 45 degree angle to the corner. The leg tapers from approximately 5" x 1 3/4" at the top to 3 5/8" x 1 1/2" at the floor. Each leg has a "V" (chevron) shaped leading edge, for design alignment in cluster arrangements.

ASSEMBLY: For shipping and storage convenience, Chevee Table legs are shipped unassembled, with metal mounting plates attached. Each leg quickly connects to the wood apron/top assembly by means of 2 metal machine bolts and 1 wood screw.

TOP OPTIONS: Chevee Tables are available in the following choices of top materials, edge details and finishes. All tops have an approximate 3/8" radius on each corner.

Laminate (G): Tops are available in any of EOC's standard high pressure laminate surfaces or optional stone laminate inlays. Includes 1/4" radiused wood banded hardwood edge and 3/8" radius corners.

Wood (W): Tops are available in wood veneer with a 1/4" radiused matching hardwood edge and 3/8" radius corners. See finish options on right column.
